

"We Have a Plan...Now What?"

A Series of Workshops Designed Around Emergency Preparedness

October 12, 2011

Response Planning

9:00 AM - 10:30 AM

Presenter: Frank Winingham, OSHA Area Director

Every business should have the ability to implement its emergency response plan (ERP) at a moment's notice. OSHA will present their plan requirements and best practices. Then OSHA and three local businesses will share their ERP template with you and/or provide tips for updating your company's ERP. They will be available to answer any questions on plan implementation, training, and team development. If you don't already have a plan, please bring along a blank USB drive.

Plan Awareness

9:00 AM - 10:30 AM

Presenter: EPTec, Inc. - Lenora Borchardt, President

Having an Emergency Response Plan is a must, but how useful is the plan if your employees do not know about the plan? Attend this presentation for help with developing a system on training and testing your plan with your employees.

Employee Preparedness

9:00 AM - 10:30 AM

Presenter: Nick Cluppert, Disaster Services Regional Manager, Training & Dvlpmt.
Linda Kollmann, Director of Winnebago County Emergency Management

The Emergency Response Plan has been activated but your employees are more concerned about their families and homes. Attend this presentation so that in the event of a worst-case scenario, your employees will focus at work knowing they have a plan at home.
